Recruiting Manager
SAIC Inc
4031 Colonel Glenn Highway
Beavercreek, OHIO 45431

Dear Recruiting Manager,

I am interested in the junior test engineer position posted on SAIC.com .

I have 5 years of experience in electro-optic product development, integration, and testing. At IBM and JDS Uniphase, I performed integration and qualification testing on gigabit ethernet and fibre-channel fiber optic transceivers. I performed integration and qualification testing on both optical and electrical performance on both the transmit (EO) and receive (OE) ends. Integration duties involved finding ideal laser setpoints and signal shaping across operational temperature and voltage ranges. Qualification testing involved performing a wide gamut of tests across operational temperature, voltage and frequency ranges. In these roles I used digital communications analyzers, spectrum analyzers, pattern generators with software written in LabVIEW automating iterative aspects of the test procedure. Data was written to a database. I wrote software to query the database to automate analysis for report generation.

The junior test engineer sounds like a wonderful opportunity, and I would welcome the chance for an interview to discuss your needs and outline my strengths in person. You may reach me at (507) 990-9052 or nick.klosterman@gmail.com. Thank you for your time and consideration of my resume. I look forward to speaking with you.

Sincerely yours,

Nick Klosterman
