Recruiting Manger
Belcan Tech Services
Cincinnati, OH

Dear Recruiting Manager:

I am interested in the validation engineer position posted on Monster.com.

I have extensive experience in product development and quality engineering roles. At IBM & JDS Uniphase, I helped develop and maintain LabVIEW code for product integration and test to verify that our product complied with industry standard specifications. In this role I was also responsible for generating a product validation report that demonstrated our compliance with industry standards. At Siemens, I provided failure analysis and corrective action on returned products. I identified the root cause failure and communicated the issue and corrective actions to the customer. I've also implemented data logging to MySQL and SQLite databases and automatic graph generation for easy data analysis.

The validation engineer position sounds like a wonderful opportunity, and I would welcome the chance for an interview to discuss your needs and outline my strengths in person. You may reach me at (507) 990-9052 or nick.klosterman@gmail.com. Thank you for your time and consideration of my resume. I look forward to speaking with you.

Sincerely yours,

Nick Klosterman
